Financial and Operational Reporting Consolidation

DOMINION SYSTEMS INC. | SANITIZED DELIVERY BRIEF

Matthias Ngol Samba Mbarga, MBA · Senior Business Analyst and Strategy Consultant · Jan 2022–Present

Business question and delivery

Contract reporting work involved fragmented financial and operational inputs and repeated manual reconciliation. I led requirements discovery, aligned KPI definitions, traced source-to-report needs, and supported dashboard validation and UAT. Recommended consolidating fragmented reporting into governed Power BI and Tableau workflows. The Program Manager approved the approach after reviewing the results. Stakeholders reviewed completed work and used the resulting workflow within the engagement scope. Client identities and rollout counts are not disclosed.

Outcome measurement

Reported program result Dominion Systems Inc. internal program reporting indicated approximately 30% fewer manual reporting cycles following reporting consolidation. This is a program-level result; client-specific measurement records remain confidential.

Measurement status The program figure is identified as internally reported. Comparable baseline and post-change cycle counts, measurement dates, and source logs are not published in this public brief.

Evidence and governance

My role and delivery I owned requirements, KPI definitions, source-to-report needs, and coordination with business, data, and engineering contributors through dashboard review and UAT. The Program Manager approved the approach after reviewing the results; client approval remained with authorized stakeholders.

Evidence status Engagement-specific milestones, dated acceptance records, and adoption counts are not included in this public brief.
